## About Me

Enthusiastic beginner in MERN stack development, eager to apply foundational knowledge in MongoDB, Express.js, React.js, and Node.js to build engaging and efficient web applications. Motivated to learn, grow, and contribute to collaborative projects while delivering scalable and user-centric solutions. Seeking an entry-level opportunity to enhance skills and support organizational success through innovative development.

## Skills

### MERN STACK

React.js, Node.js, Express.js, Mongodb

As a fresher MERN Stack Developer, I have hands-on experience in developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js. I have created and managed RESTful APIs to handle backend operations efficiently, while designing and implementing responsive frontend components using React for seamless user experiences. My experience includes working with MongoDB for database management, performing CRUD operations, and designing schemas.
